OFFICE OF THE ATTORNEY GENERAL
DIVISION OF CRIMINAL IDENTIFICATION
STATE OF WYOMING

CRIME IN WYOMING
JANUARY THRU DECEMBER
1983

UNIFORM CRIME REPORTING
CENTER FOR CRIMINAL JUSTICE RESEARCH

DEDICATION

This report is dedicated to all law enforcement officers, and in particular, to Officer Jon R. Hardy who lost his life in the performance of duty while endeavoring to uphold the laws of the State of Wyoming.

A native of Bowling Green, Ohio, Officer Jon R. Hardy was a graduate of the high school at Ellsworth Air Force Base, South Dakota. Having studied criminal justice in the Air Force from 1978 to 1980, Officer Hardy also served as a Rapid City South Dakota Merchant Policeman before moving to Gillette, Wyoming.

Officer Hardy was employed by the Gillette Police Department on August 16, 1982. He was promoted to the rank of Police Officer II in August, 1983.

On December 20, 1983, Police Officer Jon R. Hardy was shot and killed in the line of duty when he was ambushed during a hostage and bombing incident in Gillette, Wyoming.

Courage knows no bounds greater than that,

that a man shall give his life

in the service of his community.

ACKNOWLEDGEMENTS

The production of this report would not have been possible without the concerted effort of the police departments and sheriffs' offices throughout the State of Wyoming who report accurately and regularly to the Wyoming Uniform Crime Reporting Program Section of the Center for Criminal Justice Research. The significance of their contribution is demonstrated in this report, which presents detailed information on the extent and fluctuation of crime in Wyoming.

INTRODUCTION

This annual report of Crime in Wyoming, 1983, presents data on reported crime in Wyoming during calendar year 1983, and examines crime trends experienced in Wyoming during the past five years (1979-1983).

The data presented in this report were compiled from Uniform Crime Reporting (UCR) records submitted by Wyoming law enforcement agencies. These records are designed to collect pertinent standardized law enforcement data at the city, county and state levels and were prepared in compliance with the Federal Bureau of Investigation (FBI) Uniform Crime Reporting program standards and definitions.

Local law enforcement agencies prepare UCR forms containing offense, clearance, arrest and supplemental information and submit the reports on a monthly basis to the State UCR Section of the Center for Criminal Justice Research, Division of Criminal Identification, Office of the Attorney General.[1] The UCR Section then verifies the reports, automates the data for later analysis at the State level and forwards the reports to the FBI for use in compilation and analysis of national crime statistics.

It is important to note certain constraints which should be recognized in interpreting and drawing conclusions from the data contained herein. Although Wyoming has yet to achieve 100 percent reporting of crime data by law enforcement agencies, 74 individual agencies currently report UCR data and these agencies serve jurisdictions representing 97.9 percent of the State population.[2] Twenty-three of these agencies are sheriffs' offices and fifty-one are police departments.

---

[1]See W.S. 1977 37-1-122 for legislation mandating the reporting of crime information to the Attorney General's Office.

[2]The population figures used in preparing this report are estimates calculated from population data from the U.S. Department of Commerce, Bureau of Census and the Division of Research and Statistics, Department of Administration and Fiscal Control, State of Wyoming.

Another limitation in crime reporting practices concerns the question of how much crime is actually being reported. Law enforcement agencies are capable only of reporting crimes known to them. In many instances, citizens do not report crimes directly to these agencies but may report them to the prosecuting authorities. A considerable volume of crime is never reported to law enforcement agencies because the victims may consider the offenses against them to be of little consequence, they may believe there is nothing the police can do about them, or they may fear retaliation from the offender. Consequently, information concerning some offenses is never entered into the present statistical reporting system.

The UCR program collects data on a variety of crimes, which it categorizes as Part I crimes and Part II crimes.[3] The Part I crimes are the traditional Index offenses of murder, rape, robbery, aggravated assault, burglary, larceny-theft, auto theft, and arson. For these offenses the UCR program collects information regarding the incidence of the offenses, certain supplemental crime information, and arrest data. For Part II offenses, however, the UCR program collects only arrest data. The UCR figures do not, therefore, necessarily measure the true incidence of crimes or the actual economic loss incurred by victims.

Crimes and arrests should not be compared on a one-to-one basis; a crime is an event while an arrest relates to an individual. The two figures may not match precisely, for example, because several crimes may be solved by the arrest of a single individual. In such a case each of the crimes will be reported, but only a single arrest will appear, though each of the crimes for which the offender has been arrested may have been cleared by the arrest.

---

[3]See page 131 for definitions.

Similarly, the figures will not match where a single crime is committed by multiple offenders and each of the offenders is arrested. In this situation, a single crime is reported in UCR figures, a single clearance by an arrest appears, but several people appear in the arrest figures.

In spite of these limitations the information presented in this report portrays the most accurate and realistic assessment of crime in Wyoming. UCR statistics are not designed as indicators of agency activity for use in direct comparison, but rather pertain to a specific geographic area. A causal relationship exists between crime and many socio-economic factors. Reported crime activity, however, is a measurable quantity and, as such, it should be used to present the clearest possible picture of the dimensions, fluctuations and impact of crime in Wyoming.

Our readers are urged to use caution when interpreting the "percent change" figures which appear throughout this report. Several of the Index offenses, murder for example, occur relatively infrequently. Given the comparatively low volume of these offenses, modest fluctuations may result in significant percent changes.

The percent change figures used in this report were calculated by comparing the number of offenses reported by each law enforcement agency throughout the state while controlling for missing data. If any agency has failed to report crime data for an entire year, only those same months in each of the comparison years for which complete data are available have been used in the calculation of percent change figures.

Similarly, missing data have been excluded from the calculation of percent change figures when comparing the volume and rate of crime to 1979 levels.

Agencies who did not participate in the UCR program in 1979 were not included in subsequent years in the calculation of percent change figures. This method of calculation is used in order to avoid artificial fluctuations in reported crime based on changes in the number of contributing agencies or their reporting frequency.

CRIME INDEX

The offenses which comprise the Crime Index are all serious, either by their very nature or by the frequency with which they occur, and each presents a common enforcement problem to law enforcement agencies. Crimes within the Index are categorized as Violent Crimes (which include murder, forcible rape, robbery, and aggravated assault) or as Property Crimes (which include burglary, larceny-theft, and motor vehicle theft). By congressional mandate, arson was added as the eighth Crime Index offense in the latter part of 1978. Although arson is an Index offense, its data collection is separate and it is presented independently of other offense data in this report.

During 1983 the volume of Crime Index offenses reported to Wyoming law enforcement agencies fell 14.6 percent when compared to 1982 figures. See Table 1. This is a significant decline in reported crime and it represents the second consecutive annual decrease, i.e., reported crime was off 5.8 percent in 1982. During the past year a total of 20,468 offenses were reported or known to law enforcement agencies, compared to 23,965 in 1982.

Each of the eight offenses which comprise the Crime Index noted a decline in 1983, ranging from minus 5.3 percent for arson to minus 31.7 percent for motor vehicle theft. The violent offenses fell more sharply, off 20.1 percent, than the property crimes, which were down 14.2 percent.

The true significance of the decline experienced in 1983 emerges in our five year comparison of crime and crime rates. In 1983 both the volume of crime and the rate of crime per 10,000 persons fell below 1979 levels. See Figure 1. This is the first year during which both the volume of crime and the rate of crime fell below 1979 levels.

The data in the table and figure which follow demonstrate the significance of the decline experienced last year. Reported crime reached a high during 1981,

having steadily climbed from our 1979 base year. Crime in 1982, however, noted a shift, falling 5.8 percent, and this decline accelerated in 1983.

VIOLENT CRIMES

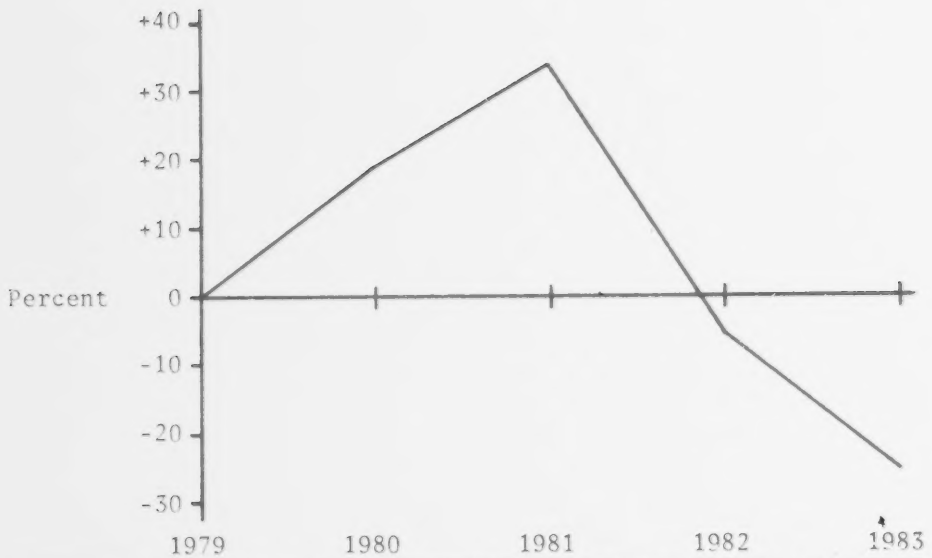
Violent crimes involve the element of personal confrontation between the perpetrator and the victim, and entail the use or threat of force or violence. By their very nature, violent crimes are considered more serious than property crimes.

Each offense in the violent crime category noted a decline in 1983 and, as a group, violent crimes fell 20.1 percent in volume when compared with 1982. See Table 1. Murder noted the most substantial decline in 1983, falling 26.3 percent. Aggravated assault, the most frequently occurring violent Index offense, fell 20.1 percent in 1983, and this offense was largely responsible for the magnitude of the overall decline noted for the violent crime category. Forcible rape was down 18.0 percent and robbery was off 11.8 percent. The violent offenses as a group accounted for 5.9 percent of the 1983 total Crime Index, compared to 6.2 percent in 1982.

Violent crimes as a group largely followed the trend established by the Index as a whole during the past five years. See Figure 2. Large increases were noted in 1980 and 1981 which were countered by substantial declines in both 1982 and 1983. Indeed, the decline during the past two years has brought the volume of violent crime significantly below the level established in 1979.

Figure 2

VIOLENT CRIMES
1979-1983
Percent Change From 1979



% Change From 1979	-	+18.5	+33.9	- 5.9	-25.2

PROPERTY CRIMES

Property crimes entail property taken from one person by another. Although property crimes are less serious in nature than their violent crime counterparts of the Index, they represent, by far, the bulk of the total Crime Index (see page 17). By virtue of the large volume of property offenses, they present a serious problem to law enforcement agencies.

As a group, the number of property crimes were off 14.2 percent in 1983 when compared to 1982. See Table 1. This represents the second consecutive yearly decline for the property offenses as a whole. Offenses of motor vehicle theft noted the sharpest decline, dropping 31.7 percent in 1983. Burglaries were down 18.3 percent and larceny-theft, the most frequently occurring Index offense, was down 11.9 percent in 1983. The property crimes accounted for 94.1 percent of the total Crime Index in 1983, compared to 93.8 percent in 1982.

During the past five years, the property crimes as a group demonstrated the same general pattern of change as the Crime Index, although the actual volume of change was more subtle than that experienced by the violent crimes. See Figure 3. Increases in 1980 and 1981 were offset by decreases in 1982 and in 1983. The substantial decline in 1983 brought the volume of property crimes below the 1979 level for the first time in four years.

CRIME RATES

Crime rates represent the rate of crime in relation to the population of a given jurisdiction. The rates are calculated to provide agencies with a means of measuring the magnitude of the crime problem that exists in relation to the number of people who reside in their jurisdiction. Crime rates allow the comparison of the volume of crime in different jurisdictions having different populations.

The population base figures used in estimating the population of Wyoming for this report were compiled from two different sources: United States Department of Commerce, Bureau of the Census, and the Department of Administration and Fiscal Control, Division of Research and Statistics, State of Wyoming.[4] In calculating the population estimates for this report we have determined the percentage difference between the 1980 Bureau of the Census enumeration and the 1980 Wyoming Division of Research and Statistics estimates. These percentage differences are then applied to the 1983 Wyoming Division of Research and Statistics estimates to calculate our population figures. This method was adopted in order to adjust the State estimates to the decennial Census enumeration. In 1983, one of the many factors used by the Division of Research and Statistics in estimating state population was revised. This revision, when applied to earlier State population estimates, necessitates our revision of earlier published crime rates. The crime rates for 1981 and 1982 have been recalculated and appear beginning on page 125.

All crime rates presented in this report are per 10,000 population. Crime rates are calculated by dividing the number of offenses by the population and

---

[4]U.S. Department of Commerce, Bureau of the Census, 1980 Census of Population and Housing, PHC80-P-52, Wyoming, Preliminary Population and Housing Unit Counts (Washington, D.C.: Bureau of the Census, 1980), and Steve Furtney and Steve Sommers, Division of Research and Statistics, Department of Administration and Fiscal Control, State of Wyoming, Wyoming Population and Employment Forecast Report, 6th Edition (Cheyenne: State of Wyoming, 1983).

multiplying the result by 10,000. Furthermore, since by UCR definition the victims of forcible rape are always female, the rape rates are per 10,000 females.

The crime rate for all Index offenses fell 15.4 percent in 1983, down from 511.5 per 10,000 population in 1982, to 432.8 in 1983. This represents the second consecutive annual drop in crime rates, though the decline in 1983 was more significant than the 6.6 percent drop witnessed in 1982. See Table 2. The violent crime rate posted a slightly sharper decline in 1983 than the property crime rate, falling 18.7 percent compared to 15.2 percent for the property crime rate. For the second consecutive year the violent crime rate dipped below the 1979 level of 34.5 per 10,000, falling to 31.5 per 10,000 in 1982 and 25.6 per 10,000 in 1983. The property crime rate of 407.2 per 10,000 in 1983 was the first decline below the 1979 level of 452.6.

[6]The "covered population" represents the Wyoming population that is covered by law enforcement agencies who contribute UCR data, and is the population base used in calculating crime rates.

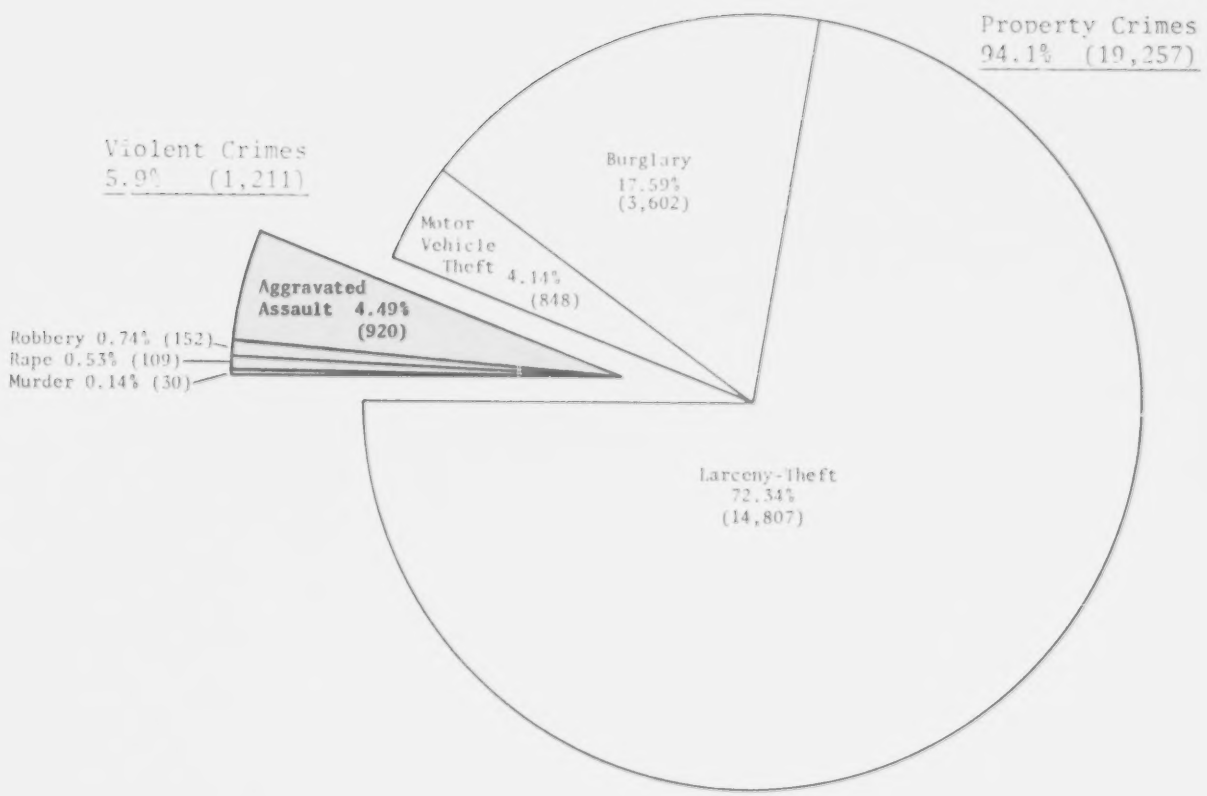
DISTRIBUTION OF INDEX OFFENSES

During 1983, a total of 20,468 Crime Index offenses were reported to Wyoming law enforcement agencies. By far, the bulk of all offenses reported in 1983 were property crimes. These totaled 19,257 or 94.1 percent of the total Index. Larceny-theft alone accounted for 72.3 percent of the total Index in 1983 and 76.9 percent of all property crimes. As a group, violent crimes were responsible for only 5.9 percent of the Crime Index total.

Given the larger volume of property crimes, any change noted in the Crime Index, as a whole, is primarily a result of the direction the property crimes take. For instance, even though the violent crimes noted a decrease of 20.1 percent in 1983, the overall change amounted to a 14.6 percent decline

Figure 8

DISTRIBUTION OF INDEX OFFENSES
1983



for the Index in its entirety. This more subtle change is a result of a 14.2 percent drop in property crimes.

The distribution of the violent and property Index offenses during the past five years, as evidenced in Figure 9, has been primarily influenced by the trend of crime. During 1980 and 1981, as crime trends increased, the proportion of violent Index crimes also increased, climbing from 7.2 percent in 1979, to 8.0 percent in 1980 and 8.2 percent in 1981. As the volume of crime began to decline in 1982, the proportion of violent Index crimes also subsided. In 1982 violent crimes dropped to 6.2 percent of the Index total and in 1983 they declined to 5.9 percent of the Index total.

DISTRIBUTION OF VIOLENT & PROPERTY CRIME
1979-1983

	1979	1980	1981	1982	1983
Property	92.8%	92.0%	91.8%	93.8%	94.1%
Violent	7.2%	8.0%	8.2%	6.2%	5.9%

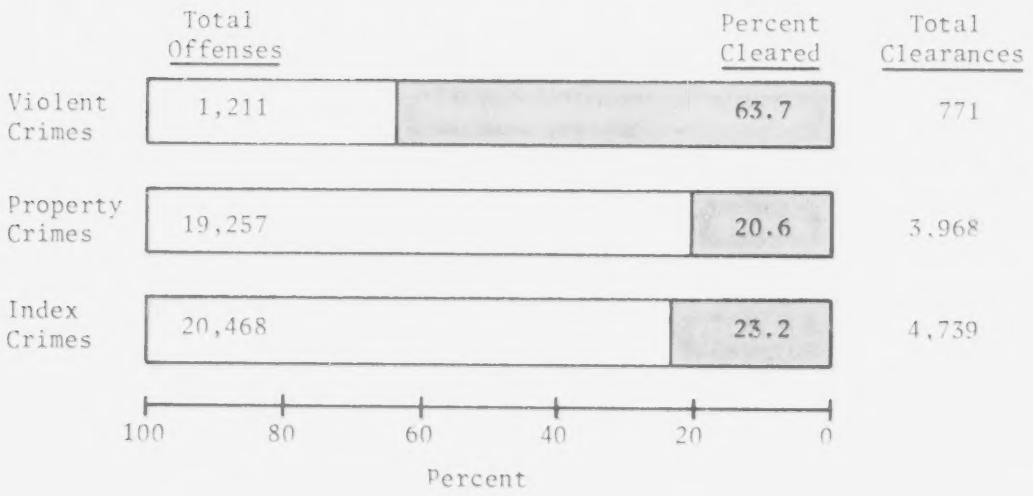
CLEARANCES

For Unifrom Crime Reporting purposes, an Index offense is cleared when 1) a law enforcement agency has identified the offender, 2) there is sufficient evidence to charge the offender, and 3) the offender is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one offense. Clearances are also recorded in exceptional circumstances when some element beyond the control of the law enforcement agency precludes formal charges being brought against the offender.

Of the 20,468 offenses reported to the police during 1983, 4,739 were cleared, for an overall clearance rate of 23.2 percent. Violent crimes evidenced a substantially higher clearance rate than property crimes, with 63.7 percent of the violent crimes resulting in a clearance, while only 20.6 percent of the property crimes were cleared.

Figure 10

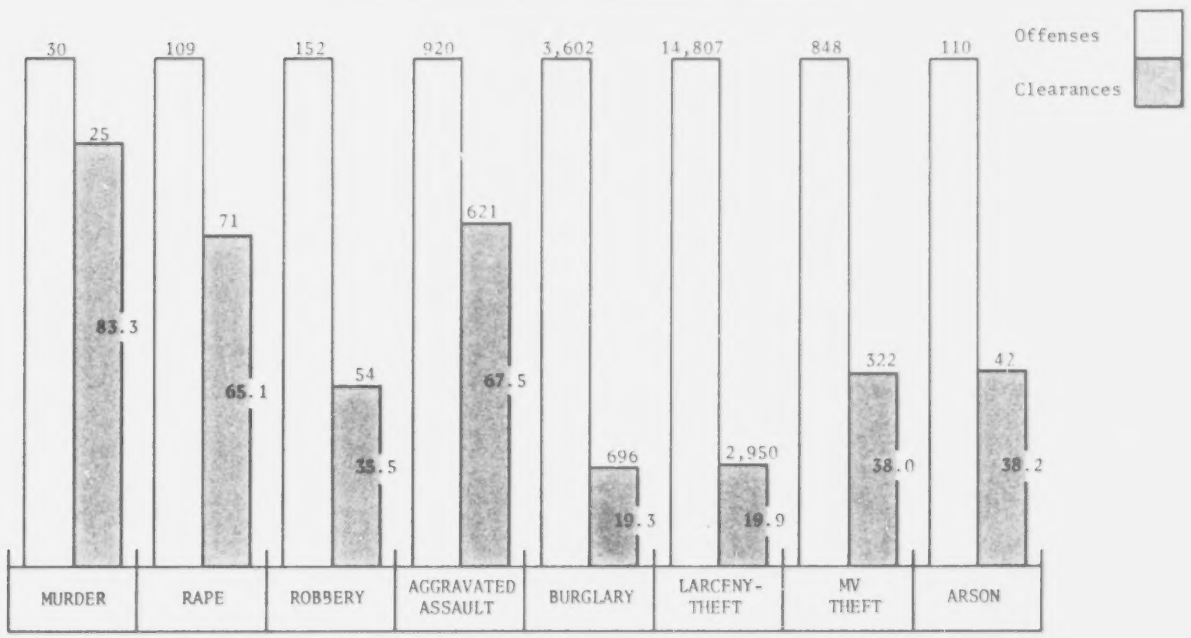
CLEARANCE RATES FOR VIOLENT, PROPERTY, AND INDEX CRIMES, 1983



The relatively high clearance rate for violent crimes compared to property crimes is due to several factors, including the volume difference between the two groups. During 1983, there were nearly sixteen times as many property crimes reported to law enforcement agencies as violent crimes. Also, because of their serious nature, police investigation of violent crime is usually more intensive. The element of personal confrontation between the victim and the offender may also contribute to the higher clearance rate for violent crimes.

Figure 11

CLEARANCE RATES FOR INDEX OFFENSES
1983



Clearances involving only persons under eighteen years of age accounted for 27.1 percent of the total clearances reported in 1983. See Table 4. During this reporting period, 1,286 clearances involving only persons under eighteen years of age were reported, of which 4.5 percent or 58 were for violent crimes and the remaining 95.5 percent or 1,228 were property crime clearances. The primary juvenile involvement was within the larceny-theft classification, which accounted for 75.3 percent of all juvenile clearances.

MONTHLY AND SEASONAL FLUCTUATIONS

While the total volume of Index offenses varied from month to month during the past five years, the table below and Figures 12-14 on the following pages illustrate the same general trend from year to year. The summer months continue to be the high volume crime months, typically peaking in July, with the exception of 1983, which peaked in August. Not surprisingly, the third quarter, July through September, recorded more offenses during each of the five years than did any other quarter.

MURDER AND NON-NEGLIGENT MANSLAUGHTER

Murder and non-negligent manslaughter is defined by the Uniform Crime Reporting Program as the willful (non-negligent) killing of one human being by another. One offense is counted for each person willfully killed by another As a general rule, any death due to injuries received in a fight, argument, quarrel, assault, or commission of a crime is counted. Attempted murders and assaults to murder are scored as aggravated assaults and not as murder. Suicides, accidental deaths, and justifiable homicides are also excluded.

During the period of January through December, 1983, 30 murders were reported or known to the police, compared to 38 murders in 1982. A comparison on an agency-by-agency basis indicates a 26.3 percent decrease in the number of murders known to the police during 1983 when compared to 1982. Murder has the lowest crime rate of any of the Index offenses and it experienced a decline of 25.0 percent in 1983. The 1983 crime rate for murder was 0.6 offenses per 10,000 population, compared to 0.8 per 10,000 in 1982. Of the 30 murders committed during 1983, 25 offenses have been reported as cleared for a clearance rate of 83.3 percent. This compares to 76.3 percent or 29 clearances during 1982. The value of property stolen incidental to the 30 murders occurring in 1983 totaled $4,499. This compares to $4,300 stolen in 1982. Offenses of murder accounted for 0.14 percent of the total Index offenses reported or known to the police in 1983, compared to 0.16 percent in 1982, a decrease of 12.5 percent.

Given the comparatively low volume and the unique nature of the crime of murder, it is not surprising that we have seen substantial fluctuation in this offense during the past five years. Murder reached a high in 1979 with 40 offenses, and it dropped to a low in 1981 with 26 offenses. The 30 offenses committed during 1983 demonstrate a decline of 27.5 percent from the level established in 1979.

In all cases of murder reported in the Uniform Crime Reporting program, a supplemental homicide report is submitted by the participating law enforcement agency. This report provides pertinent information consisting of a situation code; the age, sex, race and ethnic origin of victims and offenders; the weapon used; the relationship of the victim to the offender; and any known circumstances or motives which led to the commission of the crime. Presented in the following tables is a summary of offense, victim and offender information on the homicides reported during 1983.

FORCIBLE RAPE

Forcible rape is defined in the Uniform Crime Reporting Program as the carnal knowledge of a female forcibly and against her will. Included in this offense category are attempts or assaults to commit rape. Statutory rape (without force) and other sex offenses are not included in this category. One offense is counted for each female raped or upon whom an assault or attempt to forcibly rape has been committed.

During 1983, 109 forcible rapes were reported or known to the police as compared to 133 in 1982. A comparison on an agency-by-agency basis shows an 18.0 percent decrease in volume in 1983 from 1982. Of the 109 forcible rapes reported in 1983, 71 have been cleared for a clearance rate of 65.1 percent, compared to 87 clearances or 65.4 percent in 1982. In 1983, property loss in the rape classification was reported at $179, compared to $336 in 1982. Offenses of forcible rape and attempts to commit forcible rape accounted for 0.53 percent of the total Index offenses reported during 1983, or 5.4 percnet less than the 1982 figure of 0.56.

Unlike the offense of murder, the five year, 1979-1983, forcible rape trend was more consistent with that of the Crime Index in its entirety. Gains in 1980 and 1981 were offset by decreases in 1982 and 1983. In 1983 we saw both the volume and the rate of forcible rape dip slightly below the 1979 level. See Figures 17 and 18.

By Uniform Crime Reporting definitions, the victims of forcible rape are always female. With this fact in mind, a more accurate account of the true victimization rate for this offense requires excluding males from the population base figure. For 1983, it is estimated that 48.0 percent of the covered state population was female, a total of 226,918 persons. When males are thus excluded from the population base figure, the rate of forcible rape climbs from 2.3 per 10,000 to 4.8 per 10,000.

It is important to note that victimization studies in recent years indicate that offenses of rape are not equally distributed throughout the female population; very young and very old females are victimized less frequently than the young to middle-aged females. Given this fact, a separate crime rate was calculated for females between the ages of 14 and 64 years. The victimization rate for this subpopulation of females rises to 7.4 per 10,000 population, substantially higher than the 4.8 reported for all females.

Though the UCR program does not collect age data for victims of rape, it is believed that the exclusion of females below 14 and above 64 years of age will have no significant affect on the validity of these figures.

Table 13

	Total Number of Persons	Rapes Known to Police	Crime Rate Per 10,000	Ratio of Rapes to Females
Wyoming Population[8]	472,745	109	2.3	--
Female Population[9]	**226,918**	**109**	**4.8**	**1:2,082**
Females 14 to 64	**147,969**	**109**	**7.4**	**1:1,358**

[8]The crime rate for the entire population, male and female, is being provided for comparison with national statistics only.

[9]The percentage of the state population that is female and that portion between 14 and 64 years of age is based on data compiled by the Division of Research and Statistics, Department of Administration and Fiscal Control, State of Wyoming; Wyoming Population and Employment Forecast, 6th Edition, July, 1983.

ROBBERY

Robbery is defined as the taking or attempting to take anything of value from the care, custody or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. In any instance of robbery, one offense is counted for each distinct operation. The number of persons robbed or those present at the robbery is not considered when scoring this crime. Additionally, the number of persons committing the robbery has no bearing on the number of offenses being counted.

During the period of January through December, 1983, 152 robberies came to the attention of law enforcement officials, compared to 170 robberies in 1982. An agency-by-agency comparison with the same months for the two years indicates an 11.8 percent decrease in the number of robberies reported in 1983 from the previous year. The crime rate for robbery also noted a decline in 1983, dropping 15.8 percent. The 1983 crime rate of 3.2 robberies per 10,000 population was down from the 3.8 per 10,000 figure in 1982. Of the 152 robberies reported in 1983, 54 offenses have been cleared for a clearance rate of 35.5 percent. This compares to 52 clearances, or 30.6 percent, in 1982. The value of property stolen incidental to offenses of robbery in 1983 totaled $85,404 compared to $213,746 stolen in 1982. Robbery offenses accounted for 0.74 percent of the total Crime Index in 1983, up 2.8 percent from 1982 when robberies accounted for 0.72 percent of the Index.

While both the volume and the rate of robbery increased from 1979 to 1980, a moderate decline was posted in 1981, and this decline continued and accelerated in both 1982 and 1983. The declines experienced in 1982 and 1983 brought the volume and rate of robbery below the level established in 1979 as can be seen in Figures 21 and 22.

AGGRAVATED ASSAULT

Aggravated assault is defined as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could, and probably would, result in serious personal injury were the crime successfully completed. One offense is scored for each person assaulted or upon whom an attempt to assault has been made.

During the period of January through December, 1983, 920 aggravated assaults came to the attention of the police, compared to 1,122 offenses in 1982. An agency-by-agency comparison with the same months for the two years reflects a 21.3 percent decrease in the number of reported aggravated asssaults during 1983 when compared to 1982. A crime rate of 19.4 offenses per 10,000 persons was witnessed in 1983, compared to 24.1 per 10,000 in 1982, a drop of 19.5 percent. Of the 920 aggravated assaults known to law enforcement agencies in 1983, 621 have been cleared for a clearance rate of 67.5 percent. This compares to 667 clearances recorded in 1982 for a clearance rate of 59.4 percent. Offenses of aggravated assault accounted for 4.5 percent of the total Index offenses reported during 1983, compared to 4.8 percent in 1982, a decline of 6.3 percent.

Aggravated assaults noted moderate increases in both the volume and rate of crime from 1979 to 1981. These increases, however, were followed by substantial declines during 1982 and 1983. As a result of the magnitude of these declines, both the volume and rate of aggravated assaults recorded in 1982 and 1983 fell below the level established in 1979. See Figures 26 and 27.

SIMPLE ASSAULT

The simple assault category includes all assaults which did not involve the use of a firearm, knife or cutting instrument, or other dangerous weapon and which did not involve serious or aggravated bodily injury to the victim. Simple assault is not a Crime Index offense, however, it is collected under the assault category for quality control and for the purpose of reviewing total assaultive violence.

During the period of January through December, 1983, 1,539 simple assaults were reported or known to the police, compared to 1,843 offenses in 1982. An agency-by-agency comparison with the same months for the two years reflects an 18.8 percent decrease in the number of simple assaults reported in 1983. The crime rate for simple assault also noted a decline in 1983, down from 40.4 per 10,000 persons in 1982 to 32.5 offenses per 10,000 persons in 1983, a decrease of 19.6 percent. Of the 1,539 simple assaults known to the police in 1983, 1,088 have been cleared for a clearance rate of 70.7 percent. This compares to a clearance rate of 61.6 percent, or 1,136 clearances of simple assault in 1982. Simple assaults accounted for 62.6 percent of the total number of assault offenses in 1983, compared to 62.2 percent in 1982, an increase of 0.6 percent.

The five year trend for simple assaults evidenced substantial gains in both the volume and rate of crime during this period. Sizeable increases were posted each year from 1979 to 1982 before any decrease was noted. The number of simple assaults recorded in 1983 was down from 1982, yet the volume and rate of simple assaults remained above the level established in 1979 by 84.7 percent as can be seen in Figures 30 and 31.

LAW ENFORCEMENT OFFICERS ASSAULTED

All assaults on law enforcement officers who have full arrest powers in which the officer sustained serious injury or in which a weapon was used which could have caused serious injury or death are included in this section. Also counted are those sworn officers who were not injured, provided the assault was more than mere verbal abuse or minor resistance to an arrest. When an officer is assaulted in the line of duty, even though in an "off duty" status, where he is performing official law enforcement duties, an assault is counted.

On the average, nine of every 100 law enforcement officers, statewide, were assaulted in 1983, compared to a rate of eleven of every 100 officers in 1982. During 1983, 112 assaults on law enforcement officers were reported, compared to 144 assaults in 1982, a decrease of 30.6 percent. Of the 112 assaults reported during 1983, 98.2 percent or 110 of these assaults have been cleared as compared to 142 clearances or 98.6 percent in 1982. Injuries were sustained in 17.9 percent of the assaults in 1983, compared to 19.4 percent of the assaults in 1982.

In addition to the law enforcement officers assaulted in 1983, one officer was feloniously killed in the line of duty. Information regarding this homicide is included in the murder section and a brief synopsis of the incident can be found on page ii of this report.

The volume and rate of assaults on law enforcement officers over the past five years has noted similar trends to many of the Index crimes. Increases were noted from 1979 to 1981 which were followed by declines in 1982 and 1983. Although the volume of assaults recorded in 1983 remained 4.4 percent above the level established in 1979, the rate of assaults dipped 1.2 percent below the 1979 rate. See Figures 34 and 35.

[18]The crime rate for assaults on law enforcement officers is assaults per 100 officers.

In all cases of assaults on law enforcement officers reported in the UCR program, a supplemental report is submitted by the participating law enforcement agency. This report provides detailed information regarding a particular assault on a law enforcement officer. The supplemental reports categorize the type of activity, type of weapon, type of assignment, assault clearance data, whether the assault resulted in injury by weapon category and the time the assault occurred. The following figures and tables present a summary of the 1983 data on assaults on law enforcement officers compiled from these reports.

BURGLARY

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or a theft. The use of force to gain entry is not required to classify an offense as burglary. Burglaries in the UCR Program are categorized into three subclassifications: forcible entry, unlawful entry where no force is used and attempted forcible entry. One offense is counted for each distinct operation.

During the period of January through December, 1983, 3,602 burglaries were reported or known to law enforcement agencies compared to 4,301 burglaries during 1982. An agency-by-agency comparison with the same months on file for the two years reflects an 18.3 percent decrease in the number of reported offenses in 1983 when compared to 1982. The 1983 crime rate for burglary was also down, from 92.6 burglaries per 10,000 population in 1982 to 76.1 offenses per 10,000 persons in 1983. This represents a decrease in the crime rate of 17.8 percent. Of the 3,602 burglaries during 1983, 696 clearances have been recorded for a clearance rate of 19.3 percent. This compares to a clearance rate of 19.0 percent or 817 clearances of burglary in 1982. The value of property stolen incidental to burglaries in 1983 totaled $2,535,434. This is down 29.8 percent from the 1982 total of $3,612,109. Of all known burglaries in 1983, 57.1 percent involved residences compared to 57.6 percent in 1982. Offenses of burglary accounted for 17.6 percent of the total Index offenses reported in 1983, compared to 18.3 percent in 1982, a decrease of 3.8 percent.

The five year trend for burglary, as can be seen in Figures 40 and 41, closely follows the trend established by the Crime Index as a whole. For both the volume and rate of burglary, moderate increases were noted in 1980 and 1981, peaking in the latter. These two yearly increases were then followed by a moderate decline in 1982. This decline continued and accelerated in 1983 allowing for the 1983 volume and rate of burglary to fall below the levels set in 1979.

LARCENY-THEFT

Larceny-theft is defined as the unlawful taking, carrying, leading or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle theft, etc., in which no use of force, violence or fraud occurs. This crime category does not include embezzlement, "con" games, forgery or worthless checks. Motor vehicle theft is also excluded from the larceny category for crime reporting purposes inasmuch as a separate category is designed to capture motor vehicle thefts.

During the period of January through December, 1983, a total of 14,807 larcenies were reported or known to the police compared to 16,583 larcenies during the previous year. An agency-by-agency comparison with the same months on file for the two years shows an 11.9 percent decrease in the number of reported larcenies from the 1982 figure. The larceny crime rate of 313.2 per 10,000 population for 1983 was down 13.4 percent from the 1982 crime rate of 361.5 larcenies per 10,000 population. Of the 14,807 larcenies reported during 1983, 2,950 have been cleared for a clearance rate of 19.9 percent. This compares to a clearance rate of 18.0 percent or 2,985 clearances of larceny in 1982. Of the total larcenies reported during 1983, 35.9 percent were under $50 in value, 33.5 percent were $50 to $200 in value, and 30.6 percent were over $200 in value. Larceny offenses accounted for 72.3 percent of the total Index offenses during 1983, up 2.7 percent from 1982 when larceny comprised 70.4 percent of the total Crime Index.

Since larceny-theft represents the bulk of all Index offenses, the five year trend experienced by the Crime Index as a whole is directly influenced by

the trend larceny takes, and when compared, very similar trends emerge. See figures 47 and 48. During 1979-1981, moderate increases in the volume and rate of larcenies were noted, which was followed by a decline in 1982. This decline continued and accelerated in 1983. Although the decrease in the volume of offenses experienced in 1983 did not fall below the 1979 level, the rate of larceny was down 4.3 percent from the rate established in 1979.

MOTOR VEHICLE THEFT

Motor vehicle theft is defined as the theft or attempted theft of a motor vehicle in the Uniform Crime Reporting program. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access thereto. Also excluded are thefts of farm equipment, construction equipment, airplanes and motor boats, the theft of which is scored as a larceny. One offense is counted for each vehicle stolen or where an attempt is made to steal a motor vehicle.

During the period of January through December, 1983, a total of 848 motor vehicle thefts were reported or known to the police as compared to 1,218 motor vehicle thefts in 1982. An agency-by-agency comparison with the same months for the two years reflects a 31.7 percent decrease in the number of reported offenses during 1983 when compared to 1982. Of the 848 thefts of motor vehicles known to police in 1983, 322 offenses have been cleared for a clearance rate of 38.0 percent. This compares to 452 clearances or 37.1 percent in 1982. The value of property stolen incidental to motor vehicle thefts during 1983 totaled $4,211,456 compared to $5,166,018 stolen in 1982. Offenses of motor vehicle theft accounted for 4.1 percent of the total reported Index offenses in 1983 compared to 5.2 percent in 1982, a decrease of 21.2 percent.

The motor vehicle theft crime rate of 17.9 offenses per 10,000 population in 1983 was down 31.2 percent when compared to the 1982 rate of 26.0 motor vehicle thefts per 10,000 population. In 1983, an average of 1 of every 590 registered motor vehicles was stolen statewide compared to 1 of every 418 in 1982. The 1983 motor vehicle theft rate per 10,000 registered motor vehicles was 16.9 compared to a rate of 23.9 per 10,000 in 1982, for a decrease of 29.3 percent.

TABLE 27

MOTOR VEHICLE THEFT CRIME RATE
1983

	NUMBER OFFENSES	RATE PER 10,000	RATIO OF MV THEFTS
Covered Population	472,745 848	17.9	1 : 557
1983 Registered MV's	500,563 848	16.9	1 : 590

Unlike the five year trend experienced by the Crime Index as a whole, the volume and rate of motor vehicle thefts have been steadily decreasing over the past five years. As a result of the steady decline, as can be seen in Figures 51 & 52, the number of motor vehicle thefts reported in 1983 is nearly half of the number reported in 1979, down 49.9 percent, while the rate dropped 52.0 percent from the level established in 1979.

ARSON

Arson was established as a Crime Index offense by congressional mandate in the latter part of 1978. It is defined as any willful or malicious burning or attempt to burn, with or without intent to defraud, of a dwelling house, public building, motor vehicle or aircraft, or personal property of another.

During the period, January through December, 1983, a total of 110 arsons were reported or known to the police compared to 114 arsons in 1982. An agency-by-agency comparison with the same months for the two years shows that arson offenses were down 5.3 percent in 1983. The 1983 arson crime rate also showed a decrease, down from 2.5 arsons per 10,000 population in 1982 to 2.3 arsons per 10,000 in 1983. This represents an 8.0 percent decrease in the arson crime rate for 1983. Of the 110 arsons known to the police in 1983, 42 have been cleared for a clearance rate of 38.2 percent. This compares to 38 clearances or 33.3 percent for 1982. The estimated value of property damage during 1983 was over three times greater than that reported in 1982. The estimated value of property damage incidental to arson in 1983 totaled $4,254,960 compared to $1,332,761 in 1982.

The five year trend for arson also varied from the trend experienced by the Crime Index as a whole, as is evident in Figures 57 and 58. After reaching a peak in 1980, a steady decline occurred for both the volume and rate of arson from 1981 through 1983. As a result of this steady decline during the last three years, both the volume and rate of arson fell below the levels established in 1979.

INDEX OFFENSES BY CONTRIBUTOR

Table 31, on the following pages, illustrates Crime Index offenses, excluding arson, by county and agency for January through December, 1983. A column displaying 1982 Index totals is also provided for agency comparison. Also presented is the percent change by county and agency where sufficient months were on file to reasonably calculate the percent change.

The population coverage figures are presented in order to provide the base figures used to calculate the crime rate per 10,000 population. Population figures used in preparing this report were calculated based on data made available by the U.S. Department of Commerce, Bureau of the Census, 1980 Census of Population and Housing, and the State of Wyoming, Department of Administration and Fiscal Control, Division of Research and Statistics, Wyoming Population and Employment Forecast, 6th Edition, 1983.

The crime rate per 10,000 inhabitants was not computed for those agencies with less than twelve months on file and those agencies were excluded when calculating county and state crime rate figures.

If any agency should desire to re-calculate any of these figures using their own county or city population figures, the formula is as follows:

$$\text{Rate} = \frac{x}{y} \times 10{,}000$$

Where: x = the number of offenses (or that for which the rate per 10,000 is desired)

y = the population base

To alter the "rate" figure, simply substitute any other number for 10,000 (e.g. 1,000, 500, 250, etc.).

*This figure was calculated excluding those agencies with less than twelve months on file.

[13]The extremely high crime rate noted for Hot Springs State Park Police is primarily the result of the very low resident population base figure. It should be noted that the population of the Park is predominantly made up of residents of the Wyoming Pioneer Home.

STOLEN AND RECOVERED PROPERTY

Supplementary reports relating to the value of property stolen and recovered are also provided by the participating law enforcement agencies. This supplementary report requires a value to be established for property stolen and recovered for each Crime Index offense. The determination of the value of property stolen is an obligation of the investigating officer. The following suggested procedures aid in this determination.

A. Use fair market value for items subject to depreciation.

B. Use the wholesale cost of goods stolen from retail establishments, warehouses, etc.

C. The victim's evaluation of non-depreciable items.

D. Use replacement cost or actual cash cost to victim for new or almost new items.

Additional Guidelines:

A. When recovered property is in a condition different from what it was at the time of the theft, the value at the time of recovery is used even though it is less than at the time it was stolen.

B. The value of property stolen only refers to property stolen incidental to crimes which occur in that jurisdiction and the value of property recovered includes only property originally stolen from that jurisdiction. However, it does not matter who recovers the property or where it was recovered.

The Figure and Tables on the following pages illustrate the data provided by these supplemental reports.

Figure 62

VALUE OF LOCALLY STOLEN AND RECOVERED PROPERTY BY TYPE

January-December, 1985

TYPE OF PROPERTY	STOLEN	PERCENT RECOVERED	RECOVERED
Currency, Notes, etc.	$ 933,215	12.4	$ 115,983
Jewelry and Precious Metals	$ 786,785	13.7	$ 107,446

PERSONS ARRESTED

Although primarily an indication of law enforcement activity, the number of arrests provides a limited profile of the perpetrators of crime, especially for those crimes which have high clearance rates. Differences in arrest practices, policies, and enforcement emphasis among agencies influence the volume of arrests for various offenses, particularly those against public order, e.g., drunkenness, vagrancy, disorderly conduct and related violations. However, arrests for serious crimes, e.g., robbery or burglary, are more likely to be consistent and uniform throughout all jurisdictions. Procedures employed in the UCR Program require that an arrest be counted on each separate occasion an individual is taken into custody, notified or cited for committing an offense in that jurisdiction. Also, although several charges may be placed against a person at the time of arrest, only one arrest is counted each separate time he is taken into custody.

During 1983, Wyoming law enforcement agencies made 26,031 arrests, compared to 28,413 in 1982. This represents a decrease of 8.4%. During 1983, arrests of persons under 18 years of age fell by 9.7 percent and arrests of persons 18 years of age and overwere down 8.1 percent. When only arrests for Crime Index offenses were used for comparison, juvenile arrests were down slightly, off 0.4 percent, while arrests of adults fell 11.0 percent. Total arrests for Crime Index offenses were down 7.6 percent in 1983 when compared to 1982.

Statewide, 4.5 percent of all arrests involved persons under 15 years of age, 21.8 percent were under 19 years of age, 38.0 percent were under age 22, and 52.2 percent of those arrested were under age 25.

Further analysis of arrests of youthful offenders illustrate persons under 19 years of age comprised 41.2 percent of those arrested for Crime Index offenses, 11.1 percent of those arrested for violent crimes, and 46.1 percent of those arrested for property crimes.

When reviewing only Crime Index offenses (including arson), 15.2 percent of Wyoming arrests in 1983 were persons under 15 years of age, 41.2 percent were under age 19 and 58.0 percent were under 22 years of age.

*Percent distribution does not total 100.0 due to rounding.

Arrests of males were down 10.4 percent in 1983 from 1982, while female arrests climbed 2.6 percent for all offenses. Arrests of males outnumber those of females by nearly 5 to 1 with males accounting for 78.9 percent of the arrests for Index crimes and 91.2 percent of the arrests for violent Index crimes. Female arrests for Index crimes decreased 1.7 percent from 1982. Female criminal involvement continues to be related mainly to larceny, which accounted for 89.4 percent of all female Index offense arrests.

Illustrated on the Tables that follow is Wyoming arrest data for 1983. The first two Tables present State total summaries which are followed by Wyoming arrests by county and agency.

It should be noted here that juvenile arrests are in accordance with the age definition of a juvenile for the National Uniform Crime Reporting Program (a person under 18 years of age).

LAW ENFORCEMENT PERSONNEL

Because of varying demographic and other jurisdictional characteristics, the requirements for law enforcement service differ greatly from one locale to another. For example, the needs of a community having a highly seasonal population may be extremely different from one whose population is relatively stable. In view of differing service requirements and responsibilities, caution must be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables are best used as guides or indicators, not as recommended or desirable ratios. Specific responses for a specific locale can only be determined after thorough study and analysis of the various conditions which contribute to the requirement for law enforcement service in that jurisdiction.

SHERIFFS' OFFICES		NUMBER OF LAW ENFORCEMENT EMPLOYEES					OFFICERS PER 1,000 POPULATION	INDEX CRIMES PER OFFICER
		TOTAL EMPLOYEES	OFFICERS		CIVILIANS			
			MALE	FEMALE	MALE	FEMALE

*Index Crimes Per Officer was not calculated for those agencies with less than twelve months on file.
**This figure is based on those agencies with twelve months on file only.
†This figure is based on the fall enrollment, 1983, of 10,270 students. (University of Wy., Registrar's Office)

CONTRIBUTOR INDEX OFFENSE CRIME RATES
1979 through 1982

The population base figures used in estimating the population of Wyoming for this report were compiled from two different sources: United States Department of Commerce, Bureau of Census, and the Department of Administration and Fiscal Control, Division of Research and Statistics, State of Wyoming.[14] In calculating the population estimates for this report we have determined the percentage difference between the 1980 Bureau of the Census enumeration and the 1980 Wyoming Division of Research and Statistics estimates. These percentage differences are then applied to the 1983 Wyoming Division of Research and Statistics estimates to calculate our population figures. This method was adopted in order to adjust the State estimates to the decennial Census enumeration. In 1983, one of the many factors used by the Division of Research and Statistics in estimating state population was revised. This revision, when applied to earlier State population estimates, necessitates our revision of earlier published crime rates. The revised crime rates for 1979 through 1982 appear in the following Table.

---

[14]U.S. Department of Commerce, Bureau of the Census, 1980 Census of Population and Housing, PHC80-P-52, Wyoming, Preliminary Population and Housing Unit Counts (Washington, D.C.: Bureau of the Census, 1980), and Steve Furtney and Steve Sommers, Division of Research and Statistics, Department of Administration and Fiscal Control, State of Wyoming, Wyoming Population and Employment Forecast Report, 6th Edition (Cheyenne: State of Wyoming, 1983).

*The crime rate is calculated excluding the total offenses and population for those agencies with less than twelve months on file.

OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings designated as Part I and Part II crimes. Information on the number of Part I offenses known to law enforcement, the number cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are as follows:

1. Criminal Homicide - a. Murder and Non-Negligent Manslaughter: The willful (non-negligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) The killing of a felon by a law enforcement officer in the line of duty; and (2) The killing of a felon, by a private citizen, while in the act of committing a felony. b. Manslaughter by Negligence: The killing of another person through gross negligence. Excludes traffic fatalities. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

2. Forcible Rape - The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory rape offenses (no force used/victim under age of consent) are excluded.

3. Robbery - The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

4. Aggravated Assault - An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

5. Burglary-Breaking or Entering - The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

6. Larceny-Theft (except motor vehicle theft) - The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

7. Motor Vehicle Theft - The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

8. Arson - Any willful or malicious burning or attempt to burn, with or without intent to defraud, of a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II Offenses are:

9. Other Assaults (simple) - Assaults or attempted assaults where no weapon was used and which did not result in serious or aggravated injury to the victim.

10. Forgery and Counterfeiting - Making, altering, uttering, or possessing, with intent to defraud, anything false which is made to appear true. Attempts are included.

11. Fraud - Fraudulent conversion and obtaining money or property by false pretenses. Included are larceny by bailee and bad checks except forgeries and counterfeiting.

12. Embezzlement - Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. Stolen Property; Buying, Receiving, Possessing - Buying, receiving, possessing stolen property, including attempts.

14. Vandalism - Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control.

15. Weapons; Carrying, Possessing, Etc. - All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

16. Prostitution and Commercialized Vice - Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes. Attempts are included.

17. Sex Offenses (except forcible rape, prostitution, or commercialized vice) - Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

18. Drug Abuse Violations - State and local offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing and manufacturing of narcotic drugs.

19. Gambling - Promoting, permitting or engaging in illegal gambling.

20. Offenses Against the Family and Children - Non-support, neglect, desertion, or abuse of family and children.

21. Driving Under the Influence - Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. Liquor Laws - State or local liquor law violations, except "drunkenness" (offense 23) and "driving under the influence" (offense 21). Federal violations are excluded.

23. Drunkenness - Drunkenness or intoxication. Excluded is "driving under the influence" (offense 21).

24. Disorderly Conduct - Breach of the peace.

25. Vagrancy - Vagabondage, begging, loitering, etc.

26. All Other Offenses - All violations of state or local laws, except offenses 1-25 and traffic offenses.

27. Suspicion - No specific offense; suspect released without formal charges being placed.

28. Curfew and Loitering Laws - Offenses relating to violation of local curfew or loitering ordinances where such laws exist.

29. Runaways - Limited to juveniles taken into protective custody under provisions of local statutes.
